

## PHYSICAL RISKS

1. Landslides and land movements that can drastically affect the region's topography, causing pipeline damage and/or service restrictions
2. Accelerated erosion, wildfires, floods, or heavy rains that affect infrastructure and facilities, resulting in business continuity interruption
3. Increase in OAM expenses or operating costs due to restrictions on natural resource use
4. Inappropriate or unintentional actions by own personnel or contractors that cause damage or affect ecosystems or natural resources

# Biodiversity Risks

1.

Changes in environmental regulations that impose stricter restrictions on the use of natural resources

2.

Changes in customer preferences that impact the decrease in NG demand

3.

Taxes or fees on the use of natural resources

4.

Higher cost of financing in some of the company's projects due to the use of natural resources

5.

Affectation of the company's image

## TRANSITION RISKS

# TREATMENT ACTIONS
